

KAYSINGER BASIN REGIONAL PLANNING COMISSION

908 North Second Street
Clinton, MO 64735

Phone: 660-885-3393
Fax: 660-885-4166

PROJECT: _____ **County Hazard Mitigation Plan Update**

Please return to Tom L. Hutchings by fax or email at tom@kaysinger.com

We are in need of any community developmental trends that you are currently experiencing, or plan to implement in your community. You may also include any community developments that have occurred in the past 5 years.

Purpose of Development Trends

Future development in your county and community can and will be impacted by several natural hazards. Development plans can use the County Hazard Mitigation Plan as a guide to possible problems that could occur when building in certain areas and when building with certain materials.

The highlighted information below is from the new Benton County Hazard Mitigation Plan and is included as an example of the needed information

City of Cole Camp

In 2008, the City of Cole Camp updated their water system by adding a new water tower, lines, and meters.

City of Lincoln

Since 2005, the City of Lincoln has added a new well, replaced and updated water lines, and helped support a new 4-H building and arena by one of their parks.
